

Transportation Services – FT

Canadian Mainline Transportation Services: Firm Transportation – (FT)

Secure, Flexible Service, Over the Long Term.

Key Features and Benefits:

- Guaranteed daily delivery.
- Flexibility to assign rights to other parties, temporarily or permanently, full or partial amounts.
 - Profit from the resale of spare capacity on your FT contract.
 - Resell as little as one day of service, up to the full-term of your FT contract
- Diversion rights: High priority access to delivery points on the Canadian Mainline System other than those contracted.
 - Provides access to alternate markets.
 - Protects you from regional price fluctuations.
 - Helps you to avoid unabsorbed demand charges.
- Renewal Right: Contract can be renewed for as little as one year if a written notice is received within six months of the contract's end date (and certain other conditions are met).
- Delivery Title Transfer Option: Transfer the title of gas to another party from your FT contract at major interconnects at no extra cost.
- Minimum term of one year using existing pipe capacity, or 10 years if new pipe capacity must be built.
- FT-RAM (Firm Transportation, Risk Alleviation Mechanism): This pilot is scheduled from November 1, 2004 to October 31, 2005, and applies FT-RAM credits each month to Interruptible Transportation (IT) service. Credits are created from not fully utilized FT contracts with primary receipts originating in Alberta and Saskatchewan.

How to Obtain This Service:

- Bid for service in one of the Open Seasons that TransCanada holds regularly. Notices are posted on the www.transcanada.com website detailing the capacity offered and the bidding process.
- Sign a FT contract for the accepted bid with TransCanada; or, Sign a Permanent Assignment Agreement with TransCanada and the holder of an existing FT Contract to take over all or a portion of that existing contract-holder's service.
