

Transportation Services – IBT

Canadian Mainline Transportation Services: Interruptible Backhaul Transportation (IBT)

Interruptible Service on a Backhaul Route

Key Features and Benefits:

- Offers choices to manage market conditions.
- The service requested must be against the flow of gas on TransCanada's Canadian Mainline System over the entire path of the service – contact us if you are not sure (if not, the service would be offered as Interruptible Transportation (IT)).
- Service requests are made through daily nominations.

How to Obtain This Service

- Sign an Interruptible Backhaul Contract with TransCanada.
