

# Transportation Services – IT

## Canadian Mainline Transportation Services: Interruptible Transportation (IT)

**Purchase Daily, No Strings Attached, When the Market and the Price is Right**

### **Key Features and Benefits:**

- Flexibility to meet transportation needs when the market is right.
- Available capacity is auctioned daily to the highest bidders (above a specified floor price).
- Once approved, your shipment cannot be interrupted on that day by other service requests.
- Service is available between all designated points or zones on our System.

### **How to Obtain This Service**

- Sign a master IT Contract with TransCanada.
- IT contract holders bid through their nominations for IT service on a daily basis, indicating the quantity, the transportation path, and the bid price. Capacity is awarded based on availability and the highest total revenue to TransCanada.
