

# Transportation Services – STFT

Canadian Mainline Transportation Services:  
Short Term Firm Transportation (STFT)

Firm Service, Without Long Term Obligations

## Key Features and Benefits:

- Fill short-term transportation needs on a firm basis; has the same reliability as our Firm Transportation (FT) service.
- Range of contract terms: Minimum term of seven days and maximum term of one year less one day between any two contract points on the TransCanada System (subject to availability).
- Does not include the same flexibility as FT (eg. no diversion, renewal, assignment rights.)

## How to Obtain This Service

- Sign a STFT Contract available from any TransCanada Sales Representative.
- Bid for service in one of the Open Seasons that TransCanada holds regularly. Notices are posted on the [www.transcanada.com](http://www.transcanada.com) web site detailing the capacity offered and the bidding process.
- Interested parties submit a completed Exhibit "A" form, from their STFT Contract, indicating the quantity, the requested transportation path, and the price for their bid (the price has no maximum and must be at least equal to the service minimum). Capacity is awarded based on the highest total revenue to TransCanada. Tolls are charged only if TransCanada accepts the bid and service is provided.
- TransCanada may require financial assurances before the service is awarded.
