

Transportation Services – STS

Canadian Mainline Transportation Services
Storage Transportation Service (STS)

Allows FT Contract Holders to Move Gas in and out of Storage to Meet Seasonal Demands.

Key Features and Benefits:

- Allows Firm Transportation (FT) contracts to meet seasonal market requirements and still keep a high load factor.
- More flexibility is allowed regarding daily nominations to better balance daily gas supply and gas consumption.
- Renewal Right: Contract can be renewed for as little as one year providing that written notice is received within 6 months of the contract's end date (and that certain other conditions are met).
- Requires that the Shipper hold an FT contract.
- Minimum term of one year.

How to Obtain This Service

- Bid for service in one of the Open Seasons that TransCanada holds regularly. Notices are posted on the www.transcanada.com web site detailing the capacity offered and the bidding process.
- Once the capacity is awarded, sign an STS contract with TransCanada (you must also have an FT contract with TransCanada).
