

Tracy Robinson

Senior Vice-President and General Manager, Canadian Natural Gas Pipelines

Tracy Robinson has responsibility for all commercial, business development, project, regulatory and operating functions for the Canada Gas business unit. This includes the NGTL system, the largest natural gas gathering and transportation system for the Western Canadian Sedimentary Basin (WCSB), and the Canadian Mainline, a historic pipeline that has transported supply from the WCSB across Canada to Ontario and Québec to deliver gas to downstream Canadian and U.S. markets for six decades.

In addition to her role as Senior Vice-President and General Manager, Canadian Natural Gas Pipelines, Tracy was appointed as a member of TransCanada's Executive Leadership Team in November, 2017.

Tracy joined TransCanada in 2014 as Vice-President, Transportation for the Liquid Pipelines business unit, before moving on to serve as Vice-President, Supply Chain in 2015. Prior to joining TransCanada, Tracy spent 27 years at Canadian Pacific, serving in executive roles spanning Operations, Finance and Commercial.

Tracy has held a number of industry and private board positions. She currently serves on the Board of Directors of Smart Sand, Inc. and sits as a member of the Dean's Advisory Council at the Edwards School of Business of the University of Saskatchewan. She represents TransCanada at the Canadian Energy Pipeline Association's (CEPA) Executive Business Environment Standing Committee, on the Board of the Ontario Energy Association and on the Board of the Iroquois Gas Transmission System.

Tracy holds a Masters of Business Administration from the University of Pennsylvania's Wharton School of Business and a Bachelor of Commerce Degree from the University of Saskatchewan. She received her Institute of Corporate Directors designation in 2015.

With more than 65 years' experience, TransCanada is a leader in the [responsible development](#) and reliable operation of North American energy infrastructure including natural gas and liquids pipelines, power generation and gas storage facilities. TransCanada operates one of the largest natural gas transmission networks that extends more than 91,900 kilometres (57,100 miles), tapping into virtually all major gas supply basins in North America. TransCanada is a leading provider of gas storage and related services with 653 billion cubic feet of storage capacity. A large independent power producer, TransCanada currently owns or has interests in approximately 6,100 megawatts of power generation in Canada and the United States. TransCanada is also the developer and operator of one of North America's leading liquids pipeline systems that extends approximately 4,900 kilometres (3,000 miles), connecting growing continental oil supplies to key markets and refineries. TransCanada's common shares trade on the Toronto and New York stock exchanges under the symbol TRP. Visit TransCanada.com to learn more, or [connect with us on social media](#) and [3BL Media](#).
